Dear Mayor,

My name is Peter and I am a foreigner who migrated to Taiwan numerous years ago. The experience I've had in this country for the past couple of years was wonderful. However, there is one specific problem that I've constantly been encountering recently — There is no bicycle lane in this city. From my observation, it has caused a number of traffic problems.

With that being said, I would like to sincerely suggest that you build bicycle lanes in ^{this city} which are exclusively for bicycle riders. There are three reasons behind my recommendation. To begin with, it creates a much safer environment for bicycle riders. Once the bicycle ^{lanes} are successfully built, there will certainly be less accidents related to bicycle riders. Next, the traffic would be relatively smoother. By the time there are actual bicycle lanes in the city, the amount of vehicles in each lane will greatly decrease. Lastly, it helps the promotion of cycling and indirectly benefits the environment. With the establishment of bicycle lanes in the city, more citizens are willing to choose bicycle instead of motorcycles as their transportation. That benefits not only the physical well-being of residents in the city but also the environment they live in, as the emission of carbon dioxide generated through riding a motorcycle will definitely be reduced.

Thank you for taking your time to read this. I am very much looking forward to your response.

Sincerely,
Peter
